Recommendations (optional): In this section, provide recommendations, related to controls and/or compliance needs, that your IT manager could communicate to stakeholders to reduce risks to assets and improve Botium Toys' security posture.

In order to reduce risks to assets and improve Botium Toy's security posture, the security team should implement the following security practices.

- Least privilege: Ensure that users have access only to the data and resources necessary to perform their job responsibilities.
- Disaster recovery: Develop and maintain disaster recovery plans to ensure that critical data and systems can be restored and accessed in the event of data loss or a disaster.
- Separation of duties: Divide critical responsibilities among multiple individuals to reduce the risk of errors, fraud or unauthorized activities.

- Encryption: Encrypt sensitive data to prevent unauthorized individuals from accessing or understanding its contents, even if the data is compromised.
- Intrusion Detection System (IDS): Implement an IDS to monitor network traffic and system activity for suspicious or malicious behavior to detect potential attacks and respond to security threats in a timely manner.
